PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in SQL, Python, Excel, and Power BI, backed by a backend development foundation in relational databases and large structured datasets. Skilled in data cleaning, data validation, exploratory data analysis, and building dashboards that turn raw data into actionable business insights. Currently pursuing an MBA in Business Analytics to combine technical analysis with business decision-making.

TECHNICAL SKILLS

Data Analysis: SQL (Joins, Aggregations, Subqueries, Window Functions), Exploratory Data Analysis (EDA), Data Cleaning, Data Validation, Statistical Analysis (Hypothesis Testing, Correlation, Distributions)

Programming: Python (Pandas, NumPy, Matplotlib, Seaborn)

Databases: MySQL, Database Design, Query Optimization, Data Warehousing & ETL Fundamentals

Visualization & Reporting: Power BI, Tableau, Microsoft Excel (Advanced — Pivot Tables, VLOOKUP/XLOOKUP, Conditional Formatting, Charts, Dashboards)

Tools: Jupyter Notebook, VS Code, Git, GitHub

Concepts: Data Quality Management, Reporting Automation, KPI Tracking, Business Insights & Storytelling

PROFESSIONAL EXPERIENCE

Product Data & Content Associate

Feb 2026 – Present

Dolphin Web Solution — Ahmedabad, Gujarat

- Manage and publish data for **150+ product records weekly** through admin panels, maintaining **99%+ accuracy** before production push.
- Audited and corrected a catalog of **1,000+ listings**, cutting duplicate/incomplete entries by **25%** and improving data consistency.
- Re-categorized products using structured taxonomies, reducing misclassified listings by **20%** and improving search/navigation accuracy.
- Standardized formatting and data-entry rules across all listings, cutting downstream reporting errors by **15%**.
- Resolved **10+ data inconsistencies per week** by coordinating directly with technical teams at the source, reducing recurring fix cycles.

Laravel Developer

Jun 2025 – Dec 2025

Memento Technologies — Junagadh, Gujarat

- Better Burger:** Built a centralized backend consolidating staff attendance, order tracking, and franchise data across **5+ branches** into a single system.
- Developed franchise-performance reporting tools, **cutting manual reporting effort by 60%** and surfacing sales/operational insights across locations.
- Designed and optimized **10+ MySQL queries/schemas**, reducing report generation time from **hours to minutes** and improving data retrieval speed by **30%**.

PROJECTS

Retail Sales Performance Dashboard

SQL, Python (Pandas), Power BI

Personal Project

- Analyzed a retail sales dataset of 10,000+ transactions to identify revenue trends, top-performing product categories, and regional sales gaps.
- Cleaned and prepared raw data using Python (Pandas) — handling missing values, duplicates, inconsistent date formats, and outliers.
- Wrote SQL queries using joins, GROUP BY aggregations, and window functions to calculate month-over-month growth and customer retention metrics.
- Built an interactive Power BI dashboard with KPI cards, time-series charts, and category filters to surface insights for business stakeholders.
